This proposal was created using

BrightPropose

Hey!

Nice to meet you.

At Bright, we are absolutely thrilled about our shiny new creation, BrightPropose. We've been putting our heads together to find the perfect way to spread the word about it, and guess what? We thought, instead of just talking about it, why not show you exactly how it can work? And voilà! Presenting our tailor-made proposal just for you!

In it, we're showcasing how you can take a simple pre-made template and transform it into something uniquely yours. It's all about showing off who you are, highlighting your exceptional services, and standing out from the crowd. The best part? BrightPropose automates the process and takes the guesswork out of fee setting, so you can do all of this quickly and effectively. It's going to be a game-changer.

YOU'VE NEVER MADE A PROPOSAL THIS FAST BEFORE. REALLY. TRY IT!

WHAT ELSE?

BrightPropose goes beyond proposals too. You can also create fully branded and professional letters of engagement and emails within the software, all in a matter of minutes. That way, your clients will have a consistent and seamless onboarding experience from start to finish.

"It's great to be able to have some input into the application. BrightPropose is a brilliant bit of kit and is a credit to all of team there."

BrightPropose

WHAT'S POSSIBLE?

**With BrightPropose, our mission is crystal clear.
We're here to help you land more clients and boost your earnings.**

We firmly believe that a solid client relationship starts even before they officially hop on board, and your proposal often lays the foundation for that first impression they have of you.

So how can BrightPropose automate the process of creating impressive proposals, while allowing you to create a personalised and professional look?

Get started

1. Create templates

Templates save you time by providing pre-designed layouts, sections, and content. You don't have to start from scratch every time you create a new proposal. Whether your target clients are Private Limited Companies, Partnerships, or Charities, you're covered. Simply whip up a tailored template for each category and you're good to go!

2. Add your services

For each service you offer, define a name, description, scope of work, what type of clients will want the service, and any other relevant details. When you're ready to create a proposal for a potential client, just select the client and the services you want to include. The details of each service is automatically pulled into the proposal.

3. Automate your pricing

Define pricing structures, billing frequency, and variables like revenue, invoices, or employees. When crafting a proposal, our BrightPropose pricing automation takes the reins. It computes the total proposal price using preset configurations and service-specific variables. Effortless pricing, just like that!

Costings

Professional proposals at great value

Select a BrightPropose plan that fits your business' needs.

Service	Fee Frequency	Total
Basic	Monthly	£50.00
Essentials	Monthly	£100.00
Advanced	Monthly	£150.00

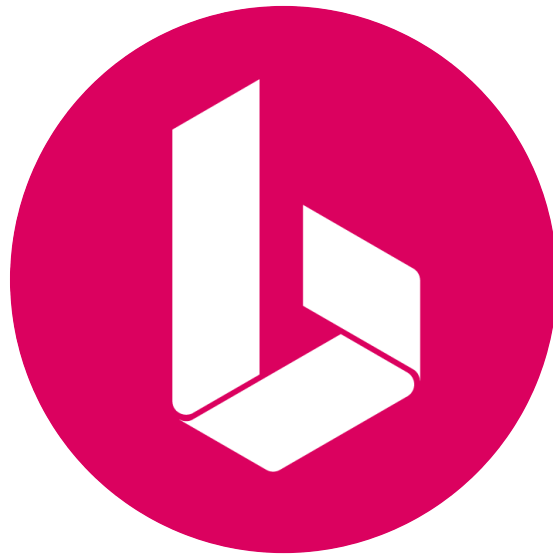

Aaron Patrick

Boffix

*"BrightPropose to me is a **great tool**. It's something we definitely have been wanting for a long time.*

*It's going to be **scalable** and ultimately it's going to be **more professional for our clients...** there is a roadmap there that really excites me ...I think it gives us an opportunity to have a much **better relationship with clients** that normally wouldn't talk to us in the first place."*
